

SMART INDIA HACKATHON 2024

TITLE PAGE

- **Problem Statement ID – SIH1664**
- **Problem Statement Title-** Developing Software Solutions to Enhance Educational Infrastructure and Connectivity in Rural Areas
- **Theme- Miscellaneous**
- **PS Category- Software**
- **Team ID-**
- **Team Name – Shokhababa Buffet**

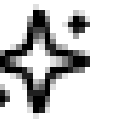

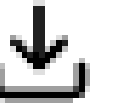

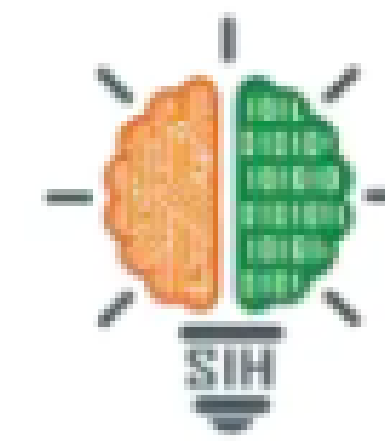

Empowering Rural Education: Innovative Software Solutions for Enhanced Infrastructure and Connectivity

❖ Proposed Solution (Describe your Idea/Solution/Prototype)

- Rural education faces unique challenges, including limited resources and connectivity issues. This presentation explores innovative software solutions that can empower rural institutions, enhancing both infrastructure and connectivity. By leveraging technology, we can bridge the educational gap and provide equitable opportunities for all students.

The collage displays four different website layouts for 'Shokhababa buffet'. Each layout features a header with the brand name and navigation links. The first layout includes a hero section with a building image and a 'Services' section. The second layout features a 'Services' section with 'Educational Software Development' and 'Infrastructure Enhancement'. The third layout shows a 'Recent posts' section, a 'Gallery', and a 'Testimonials' section. The fourth layout includes a 'Contact Us' section with a form and a 'Sign up' section.

TECHNICAL APPROACH

Technology stack

*Take detail from government about fund
for rural education*

*Search your
city and
village*

*Search
school name*

*Information
about the fund*

*Mission
corruptionless
rural India with
advancement of
education*

*Government can
get notified about
the issues of rural
schools*

*Can raise
queries if
fund misused*

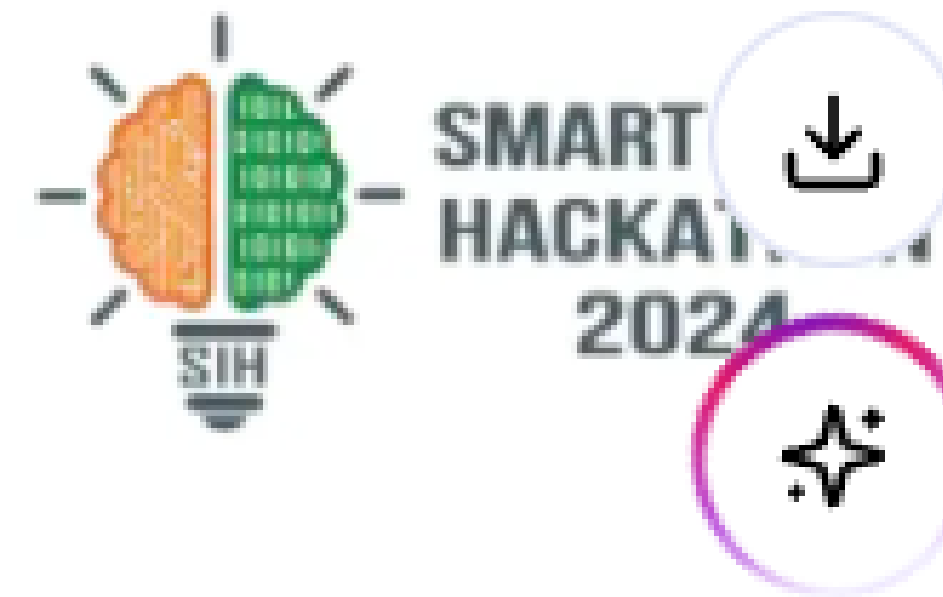

जब स्वर और व्यंजन पूरा क्लास नहीं बता पाया !
फिर मैडम जी का ज्ञान भी हैरान कर देगा आपको

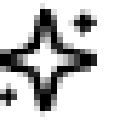

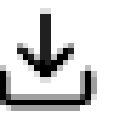

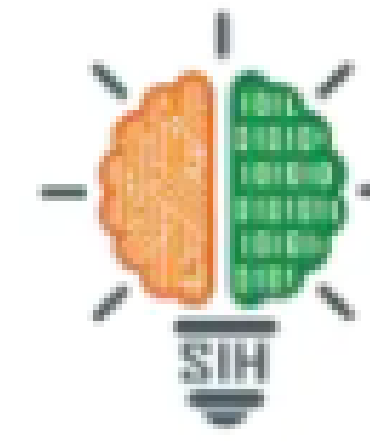

- Unqualified teachers
- Poor infrastructure
- Not regular teachers
- Corruption with funds

- Qualified teachers
- Good infrastructure
- Regular teachers
- No to corruption with funds

IMPACT AND BENEFITS

- Rural schools often encounter **significant barriers** such as
 - Inadequate **internet access**
 - Lack of qualified teachers
 - And insufficient funding
 - These challenges hinder the delivery of quality education.
-
- Understanding these issues is crucial in developing targeted **software solutions** that can effectively address these gaps and improve educational outcomes.

- To maximize the impact of software solutions, training educators is vital. Providing teachers with the necessary skills to utilize educational technology effectively ensures that they can guide students in harnessing these tools for their learning.
- *Rural development can only possible with advancement in education and connectivity.*
- Unlike other middle schools in India Chhattisgarh government started Aatmanand schools with same teachers with training and monitoring.
- *People started switching to government schools from private because of good facilities at aatmanand.*
